Who Should be Screened?

Anyone concerned about memory loss; whose family and friends have noticed changes in them; or who believe they are at risk due to a family history of Alzheimer's disease or a related illness. Screenings also are appropriate for anyone who does not have a concern right now, but who wants to see how their memory is now and for future comparisons.

Note: A memory screening is not used to diagnose any particular illness and does not replace consultation with a qualified physician or other healthcare professional.
